

Certificate Installation for Chromebooks

These steps must be done at home, if they are not the technicians will be unable to assist!

- 1) Sign into your device with your school email address.
- 2) Download the certificate from <http://www.farmcove.school.nz/images/SSL.crt>
- 3) Open a new tab and go to **chrome://certificate-manager**
- 4) Select the Authorities tab and select Import
- 5) Select the downloaded certificate and click Open. Check all three options and complete the import.

Your device will now successfully work within the school.
